JNS relet 6: I don't think Ray can do what you ask. I don't think he ever knew real names of anyone. He could, of course, identify pictures. Frank's book has some values because he parrots what he was told and those who told him didn't know what the stuff meant. The book is areal workmanlike job, like that done by a lesbian whore, and with all the sincerity and passion...I don't think any organic connection between the various assassinations. They do serve same or similar purposes....I've spent least time on Sirhan and can't offer solid opinion. Best HW 1/9/73
